

DR PHILLIP TOMSON

Phil Tomson is a Senior Clinical Lecturer and Honorary Consultant in Restorative Dentistry at Birmingham Dental Hospital and School. He is Head of Conservative Dentistry and Endodontics and Designated Individual for the Human Tissue Authority in Dentistry at Birmingham. He completed his higher specialty training in 2011 and holds specialist registration with the GDC in Restorative Dentistry, Endodontics, Fixed and Removable Prosthodontics and Periodontics. He completed a Ph.D. in 2013 with research focused on regeneration of the dentine-pulp complex. He has won the Wladimir Adlivankine ESE research prize and was one of the first recipients of the FDS research fellowships from RCS Eng. He is an editorial board member of the International Endodontic Journal and a Council member of the British Endodontic Society. His main research interests lie in tissue regeneration and engineering of the dental pulp, therapeutic methods in irrigating the root canal system and novel methods of assessing root canal disinfection. He is heavily involved in postgraduate and undergraduate teaching programs at the Birmingham School of Dentistry. Phil lectures nationally and internationally on subjects related to the clinical management of pulpal and peri radicular disease and his research.
